## INDUCTIVE COMPONENTS

## Bourns Releases Automotive Grade Semi-Shielded Power Inductor Series

Riverside, California - August 3, 2016 - Bourns Inductive Components Product Line is introducing six series of Semi-Shielded Power Inductors that are primarily designed for automotive electronics applications. They include the [SRN2010TA](#), [SRN3012TA](#), [SRN3015TA](#), [SRN4012TA](#), [SRN6045TA](#) and [SRN8040TA](#) Series. These inductor series provide effective magnetic shielding with lower radiation compared to non-shielded inductors and offer reduced cost to comparably-sized conventional ferrite shield inductors. Operating temperature ranges from -40 to +125 °C.

These series are AEC-Q200 qualified. Typical automotive application areas for these inductors are driver assistant devices, information / entertainment systems, lighting and other applications including DC/DC converters and power supplies.

Although these inductor series are primarily designed for automotive electronics applications, they are also well-suited for consumer, industrial, medical, telecom and other applications where higher inductor reliability is required.

### Product Features:

New Model	Product Size	Inductance Range	Heating Current Range	Saturation Current Range
SRN2010TA	2 x 1.6 x 1 mm	0.47 - 22 $\mu$ H	0.27 - 2.35 A	0.38 - 2.7 A
SRN3012TA	3 x 3 x 1.2 mm	1 - 22 $\mu$ H	0.61 - 2 A	0.49 - 2.15 A
SRN3015TA	3 x 3 x 1.5 mm	1 - 47 $\mu$ H	0.4 - 2.2 A	0.35 - 2.2 A
SRN4012TA	4 x 4 x 1.2 mm	0.47 - 22 $\mu$ H	0.62 - 3.2 A	0.5 - 4 A
SRN6045TA	6 x 6 x 4.2 mm	1 - 220 $\mu$ H	0.6 - 8 A	0.88 - 13.5 A
SRN8040TA	8 x 8 x 3.7 mm	0.5 - 330 $\mu$ H	0.7 - 12 A	0.75 - 17 A

The new AEC-Q200 qualified devices are comparable to the existing standard series.

<b>Automotive Grade AEC-Q200 Qualified Series</b>	<b>Existing Standard Series</b>
