## SLIDE POTENTIOMETERS

## Bourns Announces the Release of the Model PSP60 Motorized Slide Potentiometer

Riverside, California - July 26, 2017 - In line with our commitment to provide products with innovative design, superior quality and exceptional value, Bourns Sensors and Controls announces the release of the [Model PSP60 Motorized Slide Potentiometer](#) in continuing support of the professional audio and professional lighting markets. This product release supplements our Model PSP01 Motorized Slide Potentiometer with a new 60 mm option.

The Model PSP60 is a 60 mm motorized slide potentiometer with high grade characteristics including:

- Long life carbon element up to 1,000,000 cycles
- Touch sense lever
- Servo track for console automation
- A variety of standard resistance values
- A variety of standard taper options
- Snap-in connector for easy connections
- RoHS compliant\*

The Bourns® Model PSP60 motorized slide potentiometer is suitable for use in automated professional audio mixing consoles, broadcast mixing consoles, and professional lighting consoles and controllers.

Samples and production quantities are now available. For your convenience, the data sheet and material declaration are now available at [www.bourns.com](http://www.bourns.com).

Should you have any questions or need additional information, please contact [Customer Service/Inside Sales](#).
