## **Bourns 3D and SPICE Model Files**

Riverside, California - October 26, 2012 - We are pleased to announce a new feature that has been added to the Bourns website *Data Sheet Search – Product Technology* for access to 3D and SPICE Model files. Our customers, manufacturers' representatives and distributor partners can now search for a model or part number and the results will include a category of Engineering Files for that inquiry where available, in addition to the Data Sheet result.

For example, a query for the model series TBU-CA returns a 3D Model file in a STEP CAD (.stp) format and three circuit simulation SPICE model files (.txt) covering the TBU-CA025-100-WH, TBU-CA065-200-WH and TBU-CA085-200-WH.
