Bourns Announces Changes to Receptacle for Select 5-Pin Surge Protectors

Model 85028 Series

Riverside, California – November 2, 2020 – Effective November 1, 2020, the receptacle pins for the Bourns® [Model 85028 5-Pin Surge Protector Series](#) will be supplied by a new vendor. Our previous supplier stopped production of the receptacle pins for this model. The fit of the product is affected by the reduced length of the new receptacle pins. The use of new pin receptacles requires the modification of the plastic base internal cavities. The resulting internal design of the plastic housing base is not backwards compatible with the original receptacle pins. The form, function, quality, and reliability of the product will remain unchanged.

The current product design will continue production through September 2020 or until on-hand component inventory is depleted.

Affected Part Numbers		
85028-1	85028-2	85028-3

Implementation dates are as follows:

Date evaluation samples of the new model design will be available: **November 1, 2020**
