Bourns Trimpot Product Line Announces Product Enhancement for Model 3360

Bourns Trimpot Product Line is enhancing the marking on Trimpot® [Model 3360](#) Square Sealed Panel Controls by consolidating the model number and date code markings to a single side of the part. Currently, the model number and date code markings are placed on separate sides of the part.

Current Marking

Improved Marking

This modification will make the part marking easier to read and more quickly recognizable. It does not affect the fit, function, quality or reliability of the part. The consolidation of information to a single face will help improve identification of the complete part number and date code. Samples are available upon request.

Implementation dates are as follows:

We will begin phasing in this process: February 17, 2013

First date code using the above changes: 308C

Should you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
